Welcome to PEST ACADEMY - a distinctive and the only event dedicated for the pest control and management sector in Indonesia and surrounding region.

Pest is a common and major challenge for heavily-populated nations. Rising population, especially in urban areas, causes a shift in the ecosystem and create a conducive habitat for various pests and vectors. In addition, weather condition and change of climate also contribute to increasing pest population, spreading diseases to human, animal and plant. This becomes a growing concern and with the emerging public awareness about health and hygiene it drives up the demand for pest control and management service.

Indonesia, being the world's 4th most populous country, is a growing and developing market for the pest control and management service. The nation's increasing urbanisation, tropical climate and rising public health awareness are among the elements driving the sector forward and PEST ACADEMY provides the ideal platform to address current issues in pest control and management through the conference and highlight latest products, technology and services on the exhibit floor.

"Pest Academy is meant to be a channel for ASPPHAMI/IPCA members to interact with users, vendors and suppliers in a professional business environment, while at the same time, it is a learning avenue to gain knowledge, share insight and experience among the pest control and management professionals.

Our 2nd edition is coming up in 2019 and already preparation is underway with more features and more values for all attendees.

We welcome you to join us in Pest Academy 2019!"

Boyke Arie Pahlevi, SE
President

Asosiasi Perusahaan Pengendalian
Hama Indonesia (ASPPHAMI) /
Indonesia Pest Control Association (IPCA)

RECORDS FROM THE 2017 PREMIERE

PEST ACADEMY 2017 took on the theme of "Progressive Urban Pest Management Industry Through Innovative Technology". The results proved the positive market response that it indeed needs a platform to put the industry professionals, policy makers, researchers and users into one good mix.

PEST ACADEMY 2017 gathered 513 professionals together to exchange ideas, information, perspective and experience

More than 20 leading names in the industry from China, Japan, Singapore and Indonesia exhibited in PEST ACADEMY 2017

24 international and domestic speakers delivered 19 conference sessions and 5 commercial showcases

Pengendalian hama dan vektor penyakit di era masyarakat global merupakan suatu kebutuhan dalam usaha melindungi dari gangguan hama, penularan penyakit, dan memberi kenyamanan pada manusia. Upaya yang dilakukan pemerintah dalam mengendalikan hama dan vektor penyakit tidak akan optimal tanpa kontribusi semua pemangku kepentingan termasuk industri pengendalian hama. Berkembangnya industri pengendalian hama dan vektor penyakit tidak bisa dilepaskan dari penggunaan insektisida. Resistensi serangga terhadap insektisida merupakan salah satu dampak penggunaan insektisida yang tidak dikelola dengan baik, selain menyebabkan pencemaran lingkungan. Pemerintah berharap peran serta aktif dari industri pengendalian hama dan vektor penyakit dalam mencegah dan menghambat terjadinya resistensi insektisida. Saya sampaikan selamat berkonferensi dan mari bersama-sama menuju Indonesia Sehat. Sukses untuk Pest Academy 2019.

Dr. Anung Sugihantono, M.Kes

*Direktur Jenderal Pencegahan Dan Pengendalian Penyakit (P2P)
Kementerian Kesehatan Republik Indonesia*
